TIME PERIODS FOR FILING A REPLY TO THIS NOTICE:

1. Applicant is given **no new time period** if the non-compliant amendment is an after-final amendment or an amendment filed after allowance. If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
2. Applicant is given **one month**, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a *Quayle* action. Continuation of 1(c) Other: The tables throughout the specification are not visually clear, for instance, see tables on page 183. The program codes throughout the specification are not clear either. It's very hard for one of ordinary skill in the art to understand the code and make use of the invention, as for example see page 181 of the substitute specification. Furthermore, the specification appears to be a book rather than a detail description of the invention. 37 CFR 1.71 states "The specification must include a written description of the invention or discovery and of the manner and process of making and using the same, and is required to be in such full, clear, concise, and exact terms as to enable any person skilled in the art of science to which the invention or discovery appertains, or with which it is most nearly connected, to make and use the same. Therefore, the specification must include a full, clear and concise description of the invention. Also, the disclosure contains many objections, for instance, page 1 of the specification contains embedded hyperlink. Hyperlinks or other form of browser-executable code must be deleted (see MPEP 608.01). The listed reference throughout the specification must be provided in an IDS in order to consider them.
